About Me

I am an aspiring IT student with a strong interest in web development and a budding familiarity with the Laravel framework. Through hands-on projects, I've begun to navigate Laravel's intricacies and have gained experience in building dynamic web applications. My enthusiasm for learning drives me to constantly expand my skill set and tackle new challenges. With a foundation in programming fundamentals and a willingness to collaborate, I am eager to contribute effectively to a dynamic IT team. I'm excited to channel my passion into actionable results and continue growing in the world of technology.

Skills

- Web Design
- Photoshop
- Graphic Design
- FIGMA
- Web Develop
- Computer Hardware Servicing

Experience

Web Development

2022-2023

Navigatu

My team and I developed a specific website with a focus on user profiling for incubator events. We carefully planned an easy-to-use interface and added tools for event information, efficient registration, and unique attendee profiles. This project demonstrated our capacity to offer a solution that is specifically designed for the incubator community.

Web Design

2022-2023

City Health Office

I decided to use Figma to create a website for the city health office as my thesis project. I created a simple and user-friendly interface for the medical office by utilizing the many features available in Figma. A thorough and user-friendly online platform for health-related resources and information required careful consideration of information architecture, graphic design features, and smooth navigation.

Computer Hardware Technician(Summer Job)

2021-2022

Butuan Medical Center

I obtained practical experience in computer hardware servicing at the Butuan Medical Center during my summer job. I was in charge of identifying, fixing, and keeping up computer systems that were essential to the center's operations. This opportunity helped me improve my problem-solving abilities and contributed to the smooth operation of the center by allowing me to put my technical knowledge to use while also exposing me to the crucial role technology plays in a medical setting.

Education

Bachelor of Science and Information Tech.

2018 - 2023

Caraga State University

I'm a BSIT student at Caraga State University right now. I've been exposed to a variety of information technology issues throughout my academic career, giving me a strong foundation in subjects like programming, networking, and database management. I now have the skills and knowledge required to succeed in the rapidly changing sector of IT thanks to my schooling.

Computer Hardware Servicing

2016-2018

Saint Joseph Institute Of Technology

I studied computer hardware service from 2016 to 2018 as a student at Saint Joseph Institute of Technology. I immersed myself in the complexities of computer hardware during this time and developed useful diagnostic and repair abilities. I was able to build a solid foundation in hardware components, troubleshooting strategies, and system maintenance throughout my time at the institute, which prepared me for my later pursuits in the industry.
